# Edging for Event Matting

**Installation Guide**

## How to install:

### Attach Ramps: Step 1

- Ramps attach to panels in the same manner that panels connect
- Install clips to hold ramp in place

Step 2: Insert locking clips:

- Locking clips greatly increase the load capacity of Event Matting and are necessary for all Heli-Pad applications
- Fig 2: Insert locking clips as shown
- Fig 3: Push rear edges down until a positive "snap" is confirmed
- Fig 4: It may be necessary to use a hammer or screwdriver to fully engage clips, especially on soft ground.
