

## Event Matting Heavy Duty

### Specification Sheet

Heavy Duty Event Matting. Designed for both medium and heavy weight use, this innovative matting system is the ideal solution for creating temporary surfaces that protect both the ground beneath and the vehicles or pedestrians on top.

Providing a durable and reliable surface, ideal for pedestrian walkways, lightweight roadways, temporary buildings, structures, heli-pads, car parks, tent and marquee flooring, audience flooring, indoor/outdoor displays, and pitch coverings.

## PRODUCT INFORMATION

Material	PCPP
Dimensions	920mm x 230mm x 34mm
Weight/mat	2.025kg /9.7kg/m <sup>2</sup>
Temperature Stability	-49°C - +49°C
Environmental	Product can be reused
Country of Manufacture	UK
Pallet Dimensions:	1000mm x 1000mm x 950mm / Total pallet weight 290kg
Static Load:	80 tons per m <sup>2</sup>
Extra	resistant to sunlight, UV light, petrol, oil derivatives, and corrosion. The matting meets anti-slip regulations, ensuring safety for all foot traffic, even in wet or muddy conditions.
